

CLYDE C. ARELLANO

Backend Developer | Software Engineer
clydesavvy@gmail.com
<https://www.linkedin.com/in/clyde-arellano-86a330288/>

PROFESSIONAL SUMMARY

Backend Developer with experience in scalable web applications, REST API development, SQL optimization, Linux-based systems, and AI-assisted automation workflows. Skilled in PHP, Python, Docker, and backend technologies with additional experience in IoT and computer vision solutions.

TECHNICAL SKILLS

Languages

PHP, Python, Java, SQL, Perl, C++

Database & Caching

Firebase, MySQL, Redis, Memcache

Others

OpenCV, TensorFlow, MediaPipe, IoT Integration, REST APIs

Frameworks & Libraries

CakePHP, Laravel, Flask, Vuejs, JQuery

Tools & Platforms

Docker, Git, Jira, Linux

PROFESSIONAL EXPERIENCE

Backend Developer - Forty Degrees Celsius Inc.

September 2024 - Present

- Develop and maintain backend systems and web applications for the NativeCamp platform using CakePHP, Vue.js, Angular, jQuery, and MySQL.
- Optimized backend queries and caching workflows using Redis and Memcache to improve application performance.
- Collaborated with cross-functional teams using Jira and Speckit (SDD) for development, debugging, documentation, and maintenance workflows.

Software Engineer - Straive

November 2023 - March 2024

- Developed and maintained Perl and C++ scripts for transforming and processing client data into XML formats compatible with search engine server requirements.
- Worked primarily in Linux terminal environments, handling backend data transformation, scripting, debugging, and workflow automation tasks.
- Collaborated with Data Analysts, Software Engineers, and Product Managers to maintain efficient data processing pipelines and internal software workflows.

Freelance Backend & Software Developer

2021 - 2023

- Developed custom backend systems, REST APIs, and automation solutions for academic and business clients using PHP, Python, and MySQL.
- Built IoT-based automation systems integrating sensors, databases, and microcontroller technologies.
- Developed computer vision and AI-assisted applications using OpenCV, MediaPipe, and TensorFlow.

EDUCATION BACKGROUND

Bachelor of Science in Information Technology

Negros Oriental State University - Bayawan Sta. Catalina Campus
2017 - 2021
